IN BRIEF

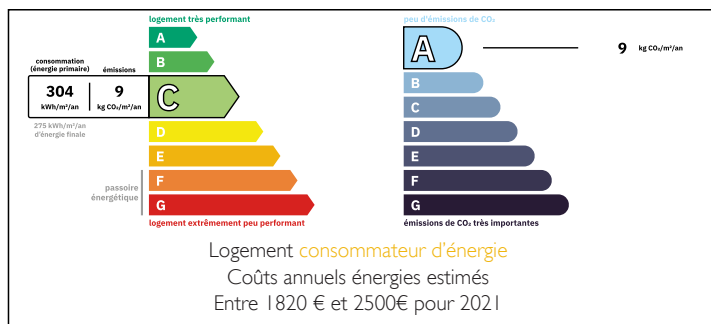

Dating back to well before 1817, which was when the mill was built alongside the chateau, this magnificent building stands alone on its own island in the river Vienne connected to the Saint Sylvain bridge by its own track for access.

Large rooms offer potential for anything you can think of : a beautiful family home, a hotel, a brew pub, a wedding venue or a conference centre are just a few ideas to get your mind thinking.

Once your project is decided, the renovations can begin. All the roofs were replaced in 2015/2016 and insulation has been carried out too. More photos are available, virtual tours and floor plans can be found on the website.
