## **NOTES**

### DESCRIPTION

The garden is enhanced by a former small lake currently being renovated.

The project, nearing completion, is being managed by the Fougères community and the DDTM, who have aimed to restore an old stream to its natural state, creating a large pond with a wetland area.

The house is connected to well water, but there is also the option to connect to the municipal water supply; a tap has been installed inside the house for this purpose and there is a water meter available (but no running contract and thus no water bill).

The house is also equipped with photovoltaic panels, generating approximately €1,100 in income per year.
