The original part of the house is heated by electric radiators and an open fireplace, while the newer wing benefits from electric underfloor heating.

The property is connected to mains water and mains drainage. A private well supplies water for the garden irrigation system and the swimming pool.

The grounds extend to approximately one hectare, with around 3,000 sq m securely enclosed around the house. Beautifully planted with pine trees, oak trees and Mediterranean species, part of the land has been left as natural woodland, providing an attractive and unspoilt setting.
